Total Cabling Solutions, Inc.
15712 SW 41st Street Suite 11
Davie, FL 33331

Dear Mr. Leonhardt,

I wanted to take a moment to thank you and your staff for providing excellent service in the structured cabling installation at the new Greenpoint Mortgage office in Coral Gables.

Project managing jobs remotely can be extremely difficult without having competent installers and technicians to perform the work and to communicate the job status on daily basis. I never felt the feeling that I was a burden to you and your techs when I discussed job details or asked for information that I needed to pass on to my customer.

The installation went very well and the branch opened on time without incident. I'd like to personally thank Clint St. George for his dedication to the project during this time. Clint was always cooperative and in good spirits when we talked. Clint did a superb job cabling, building out the MDF and installing & connecting the network equipment and making sure it worked.

Thanks also to Mark in assisting Clint on the project and to Chris Fries for his supervision and communication that was needed for a successful project.

Special thanks to Caven and Joffre for receiving, inventorying and delivering Progressive Electric purchased material to the job site and for letting me know what was received, this went very smooth!

It has been a pleasure to have worked with your company on my Florida installation and I expect to have future work for you to take care of.

I consider Total Cabling Solutions, Inc. a favored business partner and look forward to our continued relationship together.

Sincerely,

Randy Sampson
